The increased ammunition shipments were not only to constitute a reserve in case winter weather would prevent further shipments but also to replace the ammunition used in the maneuvers held at Hajmasker in November 1951.  AN INFORMER OF THE RAKOSI-ENTERPRISE IN CSEPEL  On 3 December 1951, between 1730 and 1830 hours, 149 informers arrived at the AVH (Allamvedelmi Hatosag, State Security Authority) to deliver their routine reports.  As is well-known, the numerous stool pigeons in the plants are the most important aids to the Hungarian regime. The compensation for denunciations varies from case to case and is paid in form of premiums. The informers collect information at their places of work. The material is received daily by the AVH at Belgrade Quay, corner Havass Street. Unofficial office hours for stool pigeons are held between 1630 and 2100 hours. Since most of the enterprises only work until 1600 or 1700 hours, the stool pigeons can deliver their reports after work.		CONFIDENTIAL			50X1-HU	JM ,
